Jesús Ruiz

Web Developer and Graphic Designer

I am a Junior Full Stack Developer with 2 years of experience in PHP and Laravel, and basic knowledge of frontend technologies such as JavaScript, React, Astro and NextJS. I have experience in deploying applications on various platforms, which allows me to manage projects comprehensively.

In addition, I have 6 years of experience as a Senior Graphic Designer, specialized in Visual Identity. This combination of skills allows me to contribute in all phases of the project: from the design of visual prototypes, through backend and frontend development, to deployment and maintenance.
